Abstract

This poll is part of a continuing series of monthly surveys that solicit public opinion on the presidency and on a range of other political and social issues. Specific questions covered respondents' opinions of Bill Clinton, Jesse Jackson, Newt Gingrich, Ross Perot, Bob Dole, and Colin Powell. The survey addressed in detail the possible combinations of presidential election candidates and asked respondents to forecast their vote in each given situation. Other questions asked whether respondents were spending more or less on clothes and whether they subscribed to cable television and watched C-SPAN. Background information on respondents includes voter registration status, household

Country:	United States
Geographic Coverage:	U.S. - nation, regions, states
Geographic Unit:	communities 10 to 50k
Unit of Analysis:	individuals
Universe:	adult population of the United States aged 18 and over having telephones at home
Kind of Data:	survey data

Methodology and Processing

Data Collection Methodology

Time Method:	cross-section
Data Collector:	CBS News/The New York Times
Sampling Procedure:	A variation of random-digit dialing using primary sampling units (PSUs) was employed, consisting of blocks of 100 telephone numbers identical through the eighth digit and stratified by geographic region, area code, and size of place. Within households, respondents were selected using a method developed by Leslie Kish and modified by Charles Backstrom and Gerald Hursh (see Backstrom and Hursh, SURVEY RESEARCH [Evanston, IL: Northwestern University Press, 1963]).
Mode of Data Collection:	telephone interviews
Type of Research Instrument:	structured, with 4 open-ended questions: Q10, Q28 Q33 AND Q39A. Voluntary responses are coded in Questions 11 - 15, 17, 18, 25, 26, 34, 37, 40, 46 - 48, 51, 53, 54.
Weighting:	A weight variable has been included and must be used for any analysis
Cleaning Operations:	Documentation reformatted by ICPSR.

Data Access

Dataset Availability

Location:	Inter-university Consortium for Political and Social Research
Extent of Collection:	1 data file + machine-readable documentation (text)
Number of Files:	3 files
Notes:	ICPSR created an appendix to the codebook to clarify codes for many of the standard demographic variables

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
